

Bringing the **ecological** back to
sanitation –
the need for **changes** in attitudes,
practices and policies

Mia O'Neill, MSc.

Tampere University of Technology

What influences development?

- In terms of sanitation
 - Cleanliness, health, environment
 - Financial: society productive, individual healthy
 - Social: what will others think?

The loop – reinventing the wheel

- One solution does not fit all
- Circumstances affect
- Culture, traditions, environment etc.
- Attitudes

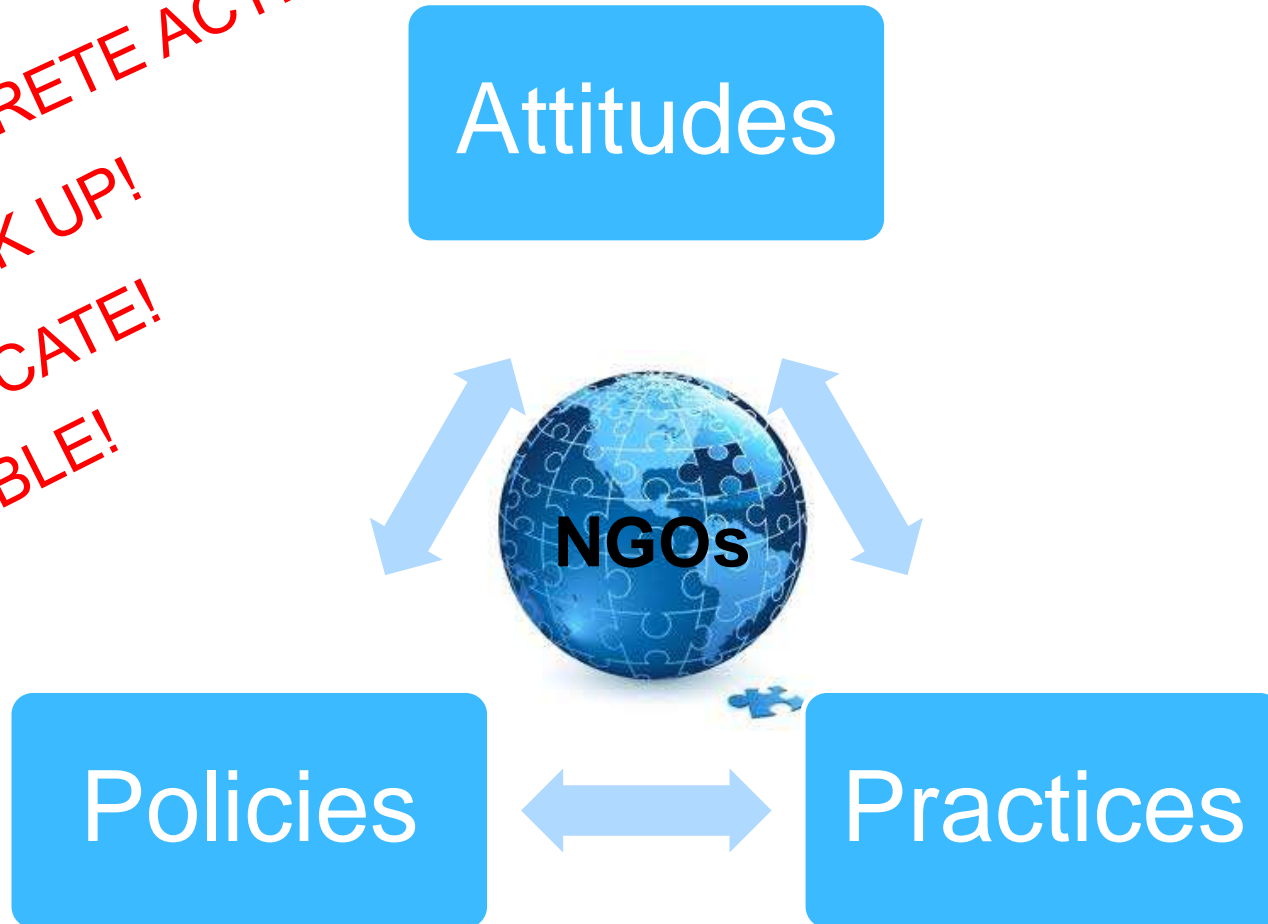

Attitudes = culture?

How to change attitudes?

CONCRETE ACTIONS
SPEAK UP!
EDUCATE!
ENABLE!

Thank you for your attention!
